Editorial Board

Australia:	Professor E. J. Anderson, University of New South Wales, Sydney
	Dr B. Jenney, Monash University, Melbourne
Belgium:	Professor L. F. Gelders, Centre for Industrial Management, Leuven
Canada:	Professor G. Abdulnour, Université du Québec à Trois Rivières
France:	Professor F. B. Vernadat, Laboratoire de Génie Industriel et de Production Mécanique, Université de Metz
Finland:	Professor H. E. Andersin, Helsinki University of Technology
Germany:	Professor Dr-Ing H. Bullinger, Fraunhofer-IAO, Stuttgart
	Professor H. Dyckhoff, RWTH Aachen
India:	Dr S. Sahu, Indian Institute of Technology, Kharagpur
Israel:	Professor E. Dar-El, Technion-Israel Institute of Technology, Haifa
	Professor D. Sipper, Tel Aviv University
Italy:	Professor A. Villa, Torino Polytechnic
Japan:	Professor M. Yamamoto, Hosei University, Tokyo
	Professor H. Ohta, Osaka Prefecture University
The Netherlands:	Professor Dr J. W. Bertrand, Technische Universiteit Eindhoven
	Dr E. M. Goldratt, Dijkstraat, VG Roelofarendsveen
Poland:	Professor Jan Weglarz, Poznan University of Technology
PR China:	Professor W. S. Lau, Hong Kong Polytechnic University
	Professor S. C. Wang, Beijing University of Aeronautics and Astronautics
Singapore:	Professor A. Y. C. Nee, National University of Singapore
South Korea:	Dr H. Hwang, Korea Advanced Institute of Science and Technology
Sweden:	Professor R. W. Grubbström, Linköping Institute of Technology
United Kingdom:	Professor C. B. Besant, Imperial College of Science and Technology, London
	Professor K. Case, Loughborough University
	Professor N. N. Z. Gindy, Nottingham University
	Professor R. H. Hollier, UMIST, Manchester
	Professor J. E. L. Simmons, Heriot-Watt University, Edinburgh
USA:	Professor J. F. Bard, The University of Texas at Austin
	Professor W. L. Berry, Ohio State University, Columbus
	Dr T.-C. Chang, Purdue University, West Lafeyette, IN
	Dr P. Dewhurst, University of Rhode Island
	Professor E. A. Elsayed, Rutgers State University, Piscataway, NJ
	Professor M. J. Magazine, University of Cincinnati
	Professor S. A. Melnyk, Michigan State University, East Lansing
	Professor D. C. Montgomery, Arizona State University, Tempe
	Professor D. C. Whybark, University of North Carolina, Chapel Hill
	Dr D. L. Woodruff, The University of California at Davis
Founding Editor:	Professor N. A. Dudley, Emeritus Professor, University of Birmingham, UK

International Journal of Production Research

Volume 38, 2000—CONTENTS

No. 1 10 January 2000

Dynamic scheduling of FMS using a real-time genetic algorithm. A. Rossi and G. Dini 1

Nexus method for stack analysis of geometric dimensioning and tolerancing (GDT) problems. B. K. A. Ngoi, B. H. Lim and P. S. Ang 21

Structured adaptive supervisory control model and software development for a flexible manufacturing system. R. G. Qiu and S. B. Joshi 39

Tactical models for hierarchical capacitated lot-sizing problems with set-ups and changeovers. A. Dumoulin and C. Vercellis 51

Adaptive direct slicing of the solid model for rapid prototyping. Z. Zhao and L. Laperrière 69

Workshop scheduling using practical (inaccurate) data—Part 3: A framework to integrate job releasing, routing and scheduling functions to create a robust predictive schedule. R. Shafaei and P. Brunn 85

Optimal layout in low-level picker-to-part systems. F. Caron, G. Marchet and A. Perego 101

Prediction of die casting process parameters by using an artificial neural network model for zinc alloys. P. K. D. V. Yarlagadda 119

The effect of push and pull lot splitting approaches on lot traceability and material handling costs in stochastic flow shop environments. H. V. Kher, M. K. Malhotra and D. C. Steele 141

Machine learning based adaptive production control for a multi-cell flexible manufacturing system operating in a random environment. Y. Arzi and A. Herbon 161

Optimal design of the inspection buffer for an unreliable process. I. Gilboa, Y. T. Herer, H. Kaspi and T. Raz 187

Efficient models for scheduling make-to-order assemblies under resource, assembly area and part availability constraints. R. Kolisch and K. Hess 207

New *p*-median approach to cell formation with alternative process plans. Y. Won 229

No. 2 20 January 2000

Building an active material requirements planning system. T. C.-T. Du and P. M. Wolfe ... 241

A partially observable simulation model for quality assurance policies. S. Yacout and N. Gautreau ... 253

Registration and integration of multiple laser scanned data for reverse engineering of complex 3D models. H.-T. Yau, C.-Y. Chen and R. G. Wilhelm ... 269

A comparison of heuristics for family and job scheduling in a flow-line manufacturing cell. J. Schaller ... 287

An interactive tool for designing manufacturing cells for an assembly job-shop. M. Gravel, W. Price and C. Gagné ... 309

Algorithm based decision support system for the concerted selection of equipment in machining/assembly cells. L. Abdel-Malek and L. J. Resare 323

Improving linear processing systems via flexibility. I. H. Nam ... 341

The effect of breakdowns on U-shaped production lines. J. Miltenburg 353

Tabu search based heuristics for multi-floor facility layout. S. Abdinnour-Helm and S. W. Hadley ... 365

A genetic algorithm for manufacturing cell formation with multiple routes and multiple objectives. C. Zhao and Z. Wu ... 385

Cumulative quantity control charts for monitoring production processes. L. Y. Chan, M. Xie and T. N. Goh ... 397

Component allocation and job sequencing for two series-connected SMD placement machines. M. Gronalt and R. Zeller ... 409

Quantifying benefits of conversion to lean manufacturing with discrete event simulation: a case study. R. B. Detty and J. C. Yingling ... 429

Parts-mix analysis in recycling-oriented manufacturing systems for multiple-item production. K. Yura, H. Ishikura and K. Hitomi ... 447

DFQM—an approach for improving the quality of assembled products. S. K. Das, V. Datla and S. Gami ... 457

Book review ... 479

No. 3 15 February 2000

Empirical findings on manufacturing cell design. U. Wemmerlöv and D. J. Johnson ... 481

Large production line optimization using simulated annealing. D. Spinellis, C. Papadopoulos and J. M. Smith ... 509

A framework for the selection of idle vehicle home locations in an automated guided vehicle system. C.-H. Hu and P. J. Egbelu ... 543

New dispatching rules for shop scheduling: a step forward. M. S. JAYAMOHAN and C. RAJENDRAN 563

Modelling and optimization of turning processes for slender parts. W. S. LIN and K. S. WANG 587

Formation of autonomous agent networks for manufacturing systems. C.-Y. HUANG and S. Y. NOF 607

Statistical monitoring and diagnosis of automatic controlled processes using dynamic PCA. F. TSUNG 625

Strategic configuration of flexible electronics assembly facilities facing stochastic requirements. M. RAJASEKHARAN and B. A. PETERS 639

An approach for estimating the end-of-life product disassembly effort and cost. S. K. DAS, P. YEDLARAJIAH and R. NARENDRA 657

Operating an FMC by a decision-tree-based adaptive production control system. Y. ARZI and L. IAROSLAVITZ 675

A similarity coefficient measure and machine-parts grouping in cellular manufacturing systems. K. MD. S. ISLAM and B. R. SARKER 699

No. 4 10 March 2000

An adaptive production control system utilizing agent technology. T. A. OTTAWAY and J. R. BURNS 721

Three dimensional biarc approximation of freeform surfaces for machining tool path generation. Y.-J. TSENG and Y.-D. CHEN 739

Validating the Malcolm Baldridge National Quality Award Framework through structural equation modelling. S. CURKOVIC, S. MELNYK, R. CALANTONE and R. HANDFIELD 765

Part family identification using a simple genetic algorithm. A. LEE-POST 793

A conceptual framework for the generation of simulation models from process plans and resource configuration. S. LEE, H. CHO and M. JUNG 811

Incorporating planned backorders in a family production context with shelf-life considerations. S. VISWANATHAN and S. K. GOYAL 829

Inspection strategies for multistage production systems with time-varying quality. M. H. VEATCH 837

Quadratic assignment problem QAP with adaptable material handling devices. S. M. BARTOLOMEI-SUÁREZ and P. J. EGBELU 855

An empirical examination of sourcing's role in developing manufacturing flexibilities. R. NARASIMHAN and A. DAS 875

A hybrid approach for concurrent layout design of cells and their flow paths in a tree configuration. Y.-C. HO and C. L. MOODIE 895

Priority scheduling policies for repair shops. V. D. R. GUIDE JR, R. SRIVASTAVA and M. E. KRAUS... 929
Scheduling unbalanced cellular manufacturing systems with lot splitting. W. T. LOCKWOOD, F. MAHMOODI, R. A. RUBEN and C. T. MOSIER 951
Efficient texture analysis for industrial inspection. T. A. MITCHELL, R. BOWDEN and M. SARHADI 967
Discussion: A note on 'A genetic algorithm approach for multiple criteria facility layout design'. L. AL-HAKIM 985
Response to Al-Hakim's note. A. A. ISLIER 991

No. 5 20 March 2000

Disassembly analysis for electromechanical products: a graph-based heuristic approach. T. C. KUO, H. C. ZHANG and S. H. HUANG 993
Simplification in the simulation of manufacturing systems. R. J. BROOKS and A. M. TOBIAS 1009
LP-based heuristics for scheduling chemical batch processes. F. BLÖMER and H.-O. GÜNTHER 1029
The cellular manufacturing layout problem. L. SALUM 1053
A wire-EDM maintenance and fault-diagnosis expert system integrated with an artificial neural network. J. T. HUANG and Y. S. LIAO 1071
Solving large unconstrained multilevel lot-sizing problems using a hybrid genetic algorithm. N. DELLAERT and J. JEUNET 1083
Theory of constraints in a service application: the Swine Graphics case. M. S. SPENCER 1101
A generic Petri net model for flexible manufacturing systems and its use for FMS control software testing. W. J. ZHANG, Q. LI, Z. M. BI and X. F. ZHA 1109
MOCACEF 1.0: multiple objective capability based approach to form part–machine groups for cellular manufacturing applications. A. BAYKASOGLU and N. N. Z. GINDY 1133
Controlled production planning for Just-In-Time short-run suppliers. B. MODARRESS, A. ANSARI and G. WILLIS 1163
Applying version management of object-oriented database technology in reactive scheduling. T. C. DU and R. J. CHIOU... 1183
A review of the modern approaches to multi-criteria cell design. S. A. MANSOURI, S. M. MOATTAR HUSSEINI and S. T. NEWMAN 1201
Optimization of cutting fluid performance. D. P. UPTON 1219
Book reviews 1225

No. 6 15 April 2000

Neural networks for cost estimation: simulations and pilot application. J. BODE 1231

Predicting glass furnace output using statistical and neural computing methods. B. CARNAHAN, R. C. WARNER, B. BIDANDA and K. LASCOLA NEEDY 1255

Performance of decomposition procedures for job shop scheduling problems with bottleneck machines. R. UZSOY and C.-S. WANG 1271

The cutting–wrapping problem in the textile industry: optimal overlap of fabric lengths and defects for maximizing return based on quality. L. ÖZDAMAR 1287

Re-evaluating the process capability indices for non-normal distributions. J.-P. CHEN 1311

ISO10303-compliant computer-aided wheel-rim design system—the framework and data model. A. J. C. TRAPPEY and C. R. CHANG 1325

Simulation study of an automated storage/retrieval system. J. P. VAN DEN BERG and A. J. R. M. (NOUD) GADEMANN 1339

An investigation of parting direction based on dexel model and fuzzy decision making. Y. H. CHEN, Y. Z. WANG and T. M. LEUNG 1357

The application of axiomatic design and lean management principles in the scope of production system segmentation. D. S. COCHRAN, W. EVERSHEIM, G. KUBIN and M. L. SESTERHENN 1377

Ex-post inventory control. C. S. TAPIERO 1397

Optimization of machining datum selection and machining tolerance allocation with genetic algorithms. W. LI, G. BAI, C. ZHANG and B. WANG 1407

A model to determine the optimal critical level and the monitoring intervals in condition-based maintenance. W. WANG 1425

Decomposition in automatic generation of Petri nets for manufacturing system control and scheduling. D. W. HE, B. STREGE, H. TOLLE and A. KUSIAK 1437

Discussion: Theory of constraints and linear programming: a re-examination. J. BALAKRISHNAN and C. H. CHENG 1459

Response to 'Theory of constraints and linear programming: a re-examination'. B. J. FINCH and R. L. LUEBBE 1465

Book review 1467

No. 7 10 May 2000

Invited paper: Challenges and chances for innovative companies in a global information society. H.-J. BULLINGER, H.-P. LENTES and O. H. SCHOLTZ 1469

Strategic, tactical and operational decisions in multi-national logistics networks: a review and discussion of modelling issues. G. SCHMIDT and W. E. WILHELM 1501

The equivalence of duplicate automated serial workstations and two-workstation tandem systems and its use in serial production line analysis. D. S. KIM and B. L. JUNG 1525

Comparative evaluation of tolerance control chart models. E. A. LEHTIHET, S. RANADE and P. DEWAN 1539

A tree-search method for solving a cutting stock assignment problem. N. R. SMITH, F. AL-KHAYYAL and P. GRIFFIN 1557

An extended scheduling model for producing corrugated boxes. A. BOLAT 1579

Two-phase approach to GT cell formation using efficient *p*-median formulations. Y. WON 1601

A flexible costing system for flexible manufacturing systems using activity based costing. T. KOLTAI, S. LOZANO, F. GUERRERO and L. ONIEVA ... 1615

Production outsourcing: a linear programming model for the Theory-Of-Constraints. A. COMAN and B. RONEN 1631

The choice of dispatching rules in a shop using internally set due-dates with quoted leadtime and tardiness costs. P. R. PHILIPOOM 1641

Pattern reduction in one-dimensional cutting stock problems. H. FOERSTER and G. WÄSCHER 1657

CNC tool path planning for multi-patch sculptured surfaces. J. H. CHO, J. W. KIM and K. KIM 1677

Cell formation and layout designs in a cellular manufacturing environment—a case study. M. BAZARGAN-LARI, H. KAEBERNICK and A. HARRAF ... 1689

Lead time prediction in unbalanced production systems. R. A. RUBEN and F. MAHMOODI 1711

No. 8 20 May 2000

A cutting plane approach for the single-product assembly system design problem. R. GADIDOV and W. WILHELM 1731

A critical assessment of the modern sociotechnical approach within production and operations management. A.H. VAN DER ZWAAN and J. DE VRIES 1755

A comparative evaluation of sequential set point adjustment procedures for tolerance control. T. M. CAVALIER and E. A. LEHTIHET 1769

Balancing concurrent engineering environmental factors for improved product development performance. S.-K. HONG and M. J. SCHNIEDERJANS 1779

Flexibility and manufacturing system design: an experimental investigation. J. P. SHEWCHUK and C. L. MOODIE 1801

A hybrid Hopfield network–genetic algorithm approach to optimal process plan selection. X. G. MING and K. L. MAK 1823

Comparison and evaluation of lot-to-order matching policies for a semiconductor assembly and test facility. J. Fowler, K. Knutson and M. Carlyle 1841

Production Flow Analysis and Simplification Toolkit (PFAST). S. A. Irani, H. Zhang, J. Zhou, H. Huang, T. K. Udai and S. Subramanian 1855

General control charts for variables. H. Shore 1875

Analytical models to predict the performance of a single-machine system under periodic and event-driven rescheduling strategies. G. E. Vieira, J. W. Herrmann and E. Lin... 1899

Temporized coloured Petri nets with changeable structure (CPN–CS) for performance modelling of dynamic production systems. Z. Jiang, M. J. Zuo, R. Y. K. Fung and P. Y. Tu 1917

A note on measuring parallelism in concurrent engineering. K. R. Haberle, R. J. Burke and R. J. Graves 1947

No. 9 15 June 2000

Invited paper: Perspectives and challenges for research in quality and reliability engineering. E. A. Elsayed 1953

Guidelines for the application of adaptive control charting schemes. L. S. Zimmer, D. C. Montgomery and G. C. Runger 1977

The OmniMate: a guidewire- and beacon-free AGV for highly reconfigurable applications. J. Borenstein 1993

Product flexibility in selecting manufacturing planning and control strategy. E. Persentili and S. E. Alptekin 2011

Simulation-based cost estimation under economic uncertainty using kernel estimators. Y. Asiedu, R. W. Besant and P. Gu 2023

A synergistic analysis of joint JIT-TQM implementation. R. S. M. Lau 2037

Dispatching rules for scheduling in assembly jobsops – Part 1. M. K. Reeja and C. Rajendran... 2051

Improved neural network model for reverse engineering. M. Yang and E. Lee 2067

Machine selection in flexible manufacturing cell: a fuzzy multiple attribute decision-making approach. T.-Y. Wang, C.-F. Shaw and Y.-L. Chen 2079

A model for comparing supply chain schedule integration approaches. J. Wei and L. Krajewski 2099

Implementatrion of an object-oriented tool for the simulation of manufacturing systems and its application to study the effects of flexibility. D. Borenstein 2125

A labour-constrained model for aggregate production planning. J. P. Silva, J. Lisboa and P. Huang 2143

Book review 2153

No. 10 10 July 2000

Performance evaluation of an auction-based manufacturing system using coloured Petri nets. M. NANDULA and S. P. DUTTA... 2155

Scheduling a batch processing machine with non-identical job sizes. M. AZIZOGLU and S. WEBSTER 2173

An algorithm for optimising the servicing of products with constrained, multiple defects. S. W. LYE, S. G. LEE and M. K. KHOO 2185

Modelling the relationship between process parameters and mechanical properties using Bayesian neural networks for powder metal parts. R. P. CHERIAN, P. S. MIDHA and A. G. PIPE 2201

Automated accessibility analysis and measurement clustering for CMMs. A. Vafaeesefat and H. A. ELMARAGHY... 2215

Simulated annealing for parallel machine scheduling with earliness–tardiness penalties and sequence-dependent set-up times. S. RADHAKRISHNAN and J. A. VENTURA 2233

Fuzzy mapping of functions onto features in detail design. C.-X. (JACK) FENG, D. E. KROLL and P.-G. LI 2253

A stochastic model of a reconfigurable manufacturing system – Part 1: A framework. ZHAO X., WANG J. and LUO Z.... 2273

Rolling-horizon lot-sizing when set-up times are sequence-dependent. A. R. CLARK and S. J. CLARK 2287

An integrated joint optimization procedure for robust and tolerance design. B.-R. CHO, Y. J. KIM, D. L. KIMBLER and M. D. PHILLIPS 2309

Cellular manufacturing system design using a holonistic approach. M. S. AKTURK and A. TURKCAN 2327

Dispatching rules for scheduling in assembly jobshops – Part 2. M. K. REEJA and C. RAJENDRAN... 2349

No. 11 20 July 2000

Push and pull strategies for controlling multistage production systems. A. GROSFELD-NIR, M. MAGAZINE and A. VANBERKEL 2361

A critical evaluation of Shingo's 'SMED' (Single Minute Exchange of Die) methodology. R. I. MCINTOSH, S. J. CULLEY, A. R. MILEHAM and G. W. OWEN 2377

Evaluating the manufacturability of machined parts and their setup plans. S. K. ONG and L. C. CHEW 2397

Aggregate line capacity design for PWB assembly systems. Z. HUA and P. BANERJEE 2417

Extraction of milling know-how from NC programs through reverse engineering. X. YAN, K. YAMAZAKI and J. LIU... 2443

Modified Hamiltonian chain: a graph theoretic approach to group technology. S. K. MUKHOPADHYAY, K. R. BABU and K. V. V. SAI 2459

Facility description language for integrating distributed designs. M. A. LARA, J. P. WITZERMAN and S. Y. NOF 2471

ISTS: a new procedure for the integrated scheduling of multi-stage systems. A. PORTIOLI STAUDACHER 2489

A sytems approach to photolithography process optimization in an electronics manufacturing environment. A. DONIAVI, A. R. MILEHAM and L. B. NEWNES 2515

Determination of the number of containers, production kanbans and withdrawal kanbans; and scheduling in kanban flowshops—Part 1. B. HEMAMALINI and C. RAJENDRAN 2529

Determination of the number of containers, production kanbans and withdrawal kanbans; and scheduling in kanban flowshops—Part 2. B. HEMAMALINI and C. RAJENDRAN 2549

On solving facility layout problems using genetic algorithms. L. AL-HAKIM 2573

No. 12 15 August 2000

Invited paper—The natural environment: towards an essential factor of the future. H. DYCKHOFF 2583

Case studies based development of a rule-base for the specification of manufacturing planning and control systems. A. HOWARD, A. KOCHHAR and J. DILWORTH 2591

Improving the manufacturing process quality and capability using experimental design: a case study. J. ANTONY 2607

Integrating assembly and machining planning using graph-based representation models. Y.-J. TSENG and L.-C. LIOU 2619

The shift level of the utilization of capacity as the stochastic variable in work sampling. M. M. KLARIN, J. M. CVIJANOVIC and V. K. SPASOJEVIC BRKIC 2643

Using genetic algorithms to solve the multi-product JIT sequencing problem with set-ups. P. R. MCMULLEN, P. TARASEWICH and G. V. FRAZIER 2653

A simulated annealing-based optimization algorithm for process planning. G. H. MA, Y. F. ZHANG and A. Y. C. NEE 2671

Implementation sequence of engineering and management techniques for enhancing the effectiveness of production and inventory control system. P. YENRADEE and R. DANGTON 2689

Integrated tool positioning and tool path planning for five-axis machining of sculptured surfaces. N. RAO, F. ISMAIL and S. BEDI 2709

Optimizing the cutting of stock plates in a furniture company. R. MORABITO and M. ARENALES 2725

The Internet as a tool with application to agile manufacturing: a web-based engineering approach and its implementation issues. K. CHENG, P. Y. PAN and D. K. HARRISON 2743

A multi-level heuristic search algorithm for production scheduling. S. YADAV, Y. XU and D. XUE 2761

Evolutionary modelling and optimization of grinding processes. C. W. LEE and Y. C. SHIN 2787

Allocation of variance reduction targets under the influence of supplier interaction. R. PLANTE 2815

A stochastic model of a reconfigurable manufacturing system. Part 2: Optimal configurations. ZHAO X., WANG J. and LUO Z.... 2829

Book review 2843

No. 13 10 September 2000

Approximate analysis of production systems operated by a CONWIP/finite buffer hybrid control policy. A. M. BONVIK, Y. DALLERY and S. B. GERSHWIN 2845

Joint economic design of $\bar{x}$ and R charts under Weibull shock models. M. A. RAHIM and A. F. B. COSTA... 2871

Visibility theory and algorithms with application to manufacturing processes. Z.-P. YIN, H. DING and Y.-L. XIONG 2891

The integrated machine allocation and layout problem. T. L. URBAN, W.-C. CHIANG and R. A. RUSSELL 2911

Integrating flexible routing and algebraic deadlock avoidance policies in automated manufacturing systems. M. LAWLEY 2931

Optimal control of a job-shop production system: periodic versus dynamic type. M. MATSUI, K. KANEDA and K. KANBARA 2951

Roundness inspection strategies for machine visions using non-linear programs and genetic algorithms. M.-C. CHEN 2967

Fuzzy controlled backpropagation neural network for tool condition monitoring in face milling. R. K. DUTTA, S. PAUL and A. B. CHATTOPADHYAY 2989

Quality improvement of chemical–mechanical wafer planarization process in semiconductor manufacturing using a combined generalized linear modelling–non-linear programming approach. S.-K. S. FAN 3011

Scheduling jobs in an Alcan aluminium foundry using a genetic algorithm. M. GRAVEL, W. L. PRICE and C. GAGNÉ 3031

Cartesian machining versus parametric machining: a comparative study. A. HATNA and B. GRIEVE 3043

An improved pair-wise exchange heuristic for the dynamic plant layout problem. J. BALAKRISHNAN, C. H. CHENG and D. G. CONWAY 3067

A computer-aided EDM electrode design system for mold manufacturing. X. M. Ding, J. Y. H. Fuh, K. S. Lee, Y. F. Zhang and A. Y. C. Nee ... 3079

An alternative mean estimator for processes monitored by SPC charts. A. Chen and E. A. Elsayed 3093

Adaptive time dynamic model for production volume prediction. E. Popova and J. G. Wilson 3111

No. 14 20 September 2000

Product and process design effort allocation in concurrent engineering. M. Cantamessa and A. Villa 3131

Three-dimensional random stacking of weakly heterogeneous palletization with demand requirements and stability measures. G. Abdou and M. El-Masry 3149

The simple and multiple job assignment problems. F. Chauvet, J.-M. Proth and A. Soumare 3165

Intelligent tool path correction for improving profile accuracy in CNC turning. T. S. Suneel and S. S. Pande 3181

Determination of economic order quantities (EOQ) in an integrated material flow system. S. Choi and J. S. Noble 3203

Relating TQM, marketing and business performance: an exploratory study. A. R. Martinez-Lorente, F. W. Dewhurst and A. Gallego-Rodriguez 3227

A neural network procedure for kanban allocation in JIT production control systems. M. Savsar and M. H. Choueiki 3247

Simultaneous versus sequential loading and scheduling of flexible assembly systems. T. Sawik 3267

A GA-based approach to machining operation sequencing for prismatic parts. L. Qiao, X.-Y. Wang and S.-C. Wang 3283

Modelling, control and simulation of an IC wafer fabrication system: a generalized stochastic coloured timed Petri Net approach. M.-H. Lin and L.-C. Fu 3305

A genetic alogrithm based heuristic for adjacent paper-reel layout problem. G. Q. Zhang, J. Xue and K. K. Lai 3343

Solving machine loading problems in a flexible manufacturing system using a genetic algorithm based heuristic approach. M. K. Tiwari and N. K. Vidyarthi 3357

Dynamic management of cutting tools for flexible and quality machining. L. C. Leung and Y. V. Hui 3385

Dynamic operator assignment based on shifting machine loading. Y.-F. Hung and I-H. Chen 3403

Technical note: A modified framework for modelling set-up carryover in the capacitated lotsizing problem. M. GOPALAKRISHNAN 3421

No. 15 15 October 2000

Some models for understanding the cooperation between the supplier and the buyer. M. SHARAFALI and H. C. Co 3425

Bicriteria sequencing for just-in-time mixed-model assembly lines. W. ZERAMDINI, H. AIGBEDO and Y. MONDEN 3451

Tolerance synthesis using second-order fuzzy comprehensive evaluation and genetic algorithm. S. JI, X. LI and R. DU 3471

An integrated material flow system approach for determining the economic production quantity (EPQ). S. CHOI and J. S. NOBLE 3485

Integrated use of fuzzy c-means and fuzzy KNN for GT part family and machine cell formation. K. JOSIEN and T. W. LIAO 3513

Optimization of machining conditions for multi-tool milling operations. M. C. CAKIR and A. GÜRARDA 3537

A formal structure and implementation of a robotic material handling controller in an automated shop floor environment. Y. SON and R. A. WYSK 3553

An object-oriented neutral feature model for feature conversion. T. N. WONG and C. B. LEUNG 3573

Defining specialized design similarity measures. J. W. HERRMANN, S. BALASUBRAMANIAN and G. SINGH 3603

Forecasting policies for scheduling a stochastic due date job shop. M. SINGER 3623

Assembly/disassembly task planning and simulation using expert Petri nets. X. F. ZHA and S. Y. E. LIM 3639

Beyond competition: a framework for the 21st century. A. M. AHMED and H. S. ABDALLA 3677

No. 16 10 November 2000

A new method to improve the surface quality during CNC machining. A. I. EL-WAHAB and H. A. KISHAWY 3711

The effects of routing flexibility in a multi-stage pull-type system. M.-C. YU and T. J. GREENE 3725

Predicting stereolithography injection mould tool behaviour using models to predict ejection force and tool strength. N. HOPKINSON and P. DICKENS 3747

Dynamic single-machine scheduling under distributed decision-making. P. DEWAN and S. JOSHI 3759

Product acquisition management: current industry practice and a proposed framework. V. D. R. GUIDE JR and V. JAYARAMAN 3779

X charts with supplementary samples to control the mean and variance. A. F. B. COSTA 3801

Process cost modelling using neural networks. Q. WANG, D. J. STOCKTON and P. BAGULEY 3811

Incorporating production concerns in conceptual product design. M. K. GOVIL and E. B. MAGRAB 3823

Maximally weighted graph theoretic facilities design planning. E. G. JOHN and J. HAMMOND 3845

A genetic algorithm for FMS part type selection and machine loading. N. KUMAR and K. SHANKER 3861

An active tool-tracking system for increased productivity. M. TAP, J. R. HEWIT and S. MEERAN 3889

Balancing printed circuit board assembly line systems. S. D. LAPIERRE, L. DEBARGIS and F. SOUMIS 3899

Unidirectional circular layout for overhead material handling systems. J.-H. TING and J. M. A. TANCHOCO 3913

Project scheduling with time-varying resource constraints. R. KLEIN 3937

A mathematical approach for integrating the cell design and production planning decisions. J. E. SCHALLER, S. S. ERENGUC and A. J. VAKHARIA ... 3953

Laser metal forming processes for rapid prototyping—a review. J. LAENG, J. G. STEWART and F. W. LIOU 3973

A note on the specification of assembly systems. M. WIKTORSSON, T. ANDERSSON and M. BROMAN 3997

Book review 4003

No. 17 20 November 2000

Special Issue: Selected papers from the 15th ICPR 'Manufacturing for a global market'

Foreword. M. HILLERY 4005

Global quality: linking ergonomics and production. C. G. DRURY 4007

Managing the virtual team and controlling effectiveness. J. BAL and P. FOSTER 4019

Human mismatches and preferences for automation. M. R. ABDUL RANI, M. A. SINCLAIR and K. CASE 4033

Constructing a natural language for describing work tasks. G. A. FOSTER, R. J. BARSON and C. O'BRIEN 4041

Modified method time measurements for ergonomic planning of production systems in the manufacturing industry. M. CHRISTMANSSON,

A.-C. Falck, J. Amprazis, M. Forsman, L. Rasmusson and R. Kadefors 4051

Lean, agile or leagile? Matching your supply chain to the marketplace. R. Mason-Jones, B. Naylor and D. R. Towill 4061

A framework for strategically-driven evaluation of enterprise information systems. B. Wu and Y. Chang 4071

Decision models for outsourcing and core competencies in manufacturing. R. Dekkers 4085

The design of business processes within manufacturing systems management. B. Wu, J. M. Kay, V. Looks and M. Bennett... 4097

A distributed virtual factory in agile manufacturing environment. S. Fujii, T. Kaihara and H. Morita... 4113

Autonomy and viability—measures for agent-based manufacturing systems. C.-Y. Huang and S. Y. Nof 4129

Heterogeneous modelling tools for integrated production systems. F. Kiefer 4149

A new system architecture compared with conventional production system architectures. A. Matta, T. Tolio, F. Karaesmen and Y. Dallery 4159

Constructing virtual environments for manufacturing simulation. Z. Xu, Z. Zhao and R. W. Baines 4171

Multi-agent hybrid shop floor control system. K.-H. Choi, S.-C. Kim and S.-H. Yook 4193

Characteristics of distributed autonomous production control. H. Okubo, W. Jiahua and H. Onari 4205

Modelling stochastic lead times in a production-inventory system based on the Laplace transform method. O. Tang... 4217

Introducing capacity limitations into multi-level, multi-stage production-inventory systems applying the input–output/Laplace transform approach. R. W. Grubbström and Z. Wang 4227

Controlling production dynamics—managing uncertainties with automatic production control. J.-W. Breithaupt 4235

Simulation-based performance analysis and optimization of electronics assembly equipment. M. Grunow, H. O. Günther and A. Föhrenbach ... 4247

A machine learning approach to yield management in semiconductor manufacturing. C. K. Shin and S. C. Park 4261

Process planning for small batch manufacturing of sheet metal parts. L. J. De Vin, J. De Vries and A. H. Streppel 4273

Feature-based representation for manufacturing planning. K. Case and W. A. Wan Harun 4285

Recognition of machining features–a hybrid approach. S. M. Lam and T. N. Wong 4301

A manufacturing system design framework for computer aided industrial engineering. M. Bonney, M. Head, S. Ratchev and I. Moualek ... 4317

Adaptive nonlinear tool path optimization for five-axis machining. E. Bohez, S. S. Makhanov and K. Sonthipermpoon 4329

Tolerance allocation via simulation embedded sequential quadratic programming. C. Kao, C.-C. Li and S.-P. Chen 4345

Extended range tactility in material handling. A. Djordjevich, S. K. Tso and J. Zhang 4357

Facility layout optimization using simulation and genetic algorithms. F. Azadivar and J. Wang 4369

Capacity assignment of virtual manufacturing cells by applying lot size harmonization. K. Mertins, R. Friedland and M. Rabe 4385

Performance evaluation of cellular layouts: extension to DRC system contexts. N. C. Suresh and G. J. C. Gaalman 4393

Performance measurements in the implementation of CIM in small and medium enterprises: an empirical analysis. H. B. Marri, A. Gunasekaran and R. J. Grieve 4403

The integration of manufacturing and cost information into the engineering design process. D. S. K. Chan and W. P. Lewis 4413

Information management and design & engineering processes. D. Lutters, E. ten Brinke, A. H. Streppel and H. Kals 4429

AGV controlled FMS. F. G. Maughan and H. J. Lewis 4445

Evaluation of the costs and benefits of an environmental management system. M. Alberti, L. Caini, A. Calabrese and D. Rossi 4455

Variant-based cost estimation based on Information Management. E. ten Brinke, D. Lutters, A. H. Streppel and H. J. J. Kals 4467

Cost estimation system for machined parts. D. Ben-Arieh 4481

Distributed product and facility prototyping in extended manufacturing enterprises. S. M. Ratchev, J. Shiau and G. Valtchanov 4495

A framework for evaluating ERP projects. A. Teltumbde 4507

Dynamic modelling of surge effect and capacity limitation in supply chains. P. T. Helo 4521

Implementation of the pin-in-paste process in a contract manufacturing environment. S. S. Tonapi and K. Srihari 4535

A decision-making approach for nesting scheduling: a textile case. G. Chryssolouris, N. Papakostas and D. Mourtzis 4555

An intelligent hybrid system for initial process parameter setting of injection moulding. S. L. Mok, C. K. Kwong and W. S. Lau 4565

Pilot production and manufacturing start-up: the case of Volvo S80. H. Almgren 4577

No. 18 15 December 2000

Input control and dispatching rules in a dynamic CONWIP flow-shop. J. M. Framinan, R. Ruiz-Usano and R. Leisten 4589

Interleaving models for the analysis of twin shuttle automated storage and retrieval systems. C. J. MALMBORG 4599

Experimental assessment of a clamp actuation intensity analysis model. W. XIE, S. CHOUDHURI, S. VALLAPUZHA, E. C. DE METER and M. W. TRETHEWEY... 4611

Layout planning for facilities with fixed shapes and input and output points. J.-G. KIM and Y.-D. KIM 4635

Shape similarity assessment of polyhedral parts based on boundary models. T.-L. SUN 4655

A new class of a high-level Petri net foe modelling logical OR efficiently: coloured AND/OR Petri nets (CARPN). L. SALUM... 4671

Investigating the factors influencing the shop performance in a job shop environment with kanban-based production control. J.-W. LI and D. J. BARNES 4683

Process planning for sheet metal parts based on information management. A. H. STREPPEL, D. LUTTERS, E. TEN BRINKE and H. KALS 4701

The development of a visual interactive simulation of packaging flow lines. A. A. WEST, S. RAHIMIFARD, R. HARRISON and D. J. WILLIAMS 4717

Master production scheduling in capacitated sequence-dependent process industries. J. A. HILL, W. L. BERRY, G. K. LEONG and D. A. SCHILLING 4743

A fixture repeatability and reproducibility measure to predict the quality of machined parts. J. PAYNE and V. CARIAPA 4763

Computer-aided production management issues in the engineer-to-order production of complex capital goods explored using a simulation approach. C. HICKS and P. M. BRAIDEN 4783

Economic in-line inspection sampling strategy with learning effects. W. JANG, E. H. WANG and R. AKELLA 4811

Cycle time reduction by improved MRP-based production planning. A. AGRAWAL, I. MINIS and R. NAGI 4823

Technical note: Dimensional analysis for investment selection in industrial robots. M. BRAGLIA and R. GABBRIELLI 4843

Announcement 4849
